Subject: Testimonial for Bin Lifter

Dear John

With Manual Handling and WH&S high on our agenda our facility required a new approach to our waste handling needs.

After some intensive research it was discovered that although there are numerous options available for Bin lifting devices however only one unit was found to be TRULY compliant which is the Wrightway 2MT.

The simplicity of design, operational safety & compliance and ease of operation make the Wrightway unit exceed all of our expectations.

Upon installation Wrightway provided a group of staff members training in the use and operation of the unit in a "Train the Trainer" format which is used to educate other staff members who use the device in a concise simple method. Thus creating a group of operators who are confident in using this new equipment in a safe manner.

Since having the Wrightway 2MT unit installed and in use the risks associated with the Waste handling within this area of our facility have almost completely been eliminated.

It is without any reservation or bias, that I recommend to prospective clients the Wrightway 2MT device.

Regards,
Rod*****
